## LAWRENCE BOBO

“The Mad Scientist” - “Asia Chocolate Prince”, Chef Lawrence

The Mad Scientist’s imagination is out of the ordinary, as he does not work according to norms.

He is in a league of his own, which earned him the title of World’s Best Chocolate Showpiece in 2015’s World Pastry Cup.

Taking pride from the title, he highly depends on his inner intuitions, and dislikes anything preplanned; instead, he prefers to let things come together spontaneously through an intuitive self-expression. One can only imagine of what goes on in his mind when looking at his creations, as they often instill fear and spookiness, which often leaves an unforgettable mark in our memory stems.

## JACK RALPH

Jack Ralph's interest and passion for all things related to food and baking stretch back to when he was 10 years old. However, it wasn't until he dropped out of law school after his first year, that he would discover his love for chocolate. Thinking of being a chef one day, he began working at his local restaurant as a dishwasher. This is where he had his first experience with the pastry and chocolate world, as he was asked to make some basic desserts. The seeds were sown and his focus soon turned to chocolate specifically. He was amazed that chocolate could be so colourful and shiny and manipulated to a point where it didn't even look like chocolate anymore. He was from then on hooked. Meanwhile, he had decided during all of this that he wanted to be a chocolatier, juggling a full time cafe job with growing Art Chocolat on the side. He managed to make the transition successfully and today, he is constantly working on trying to grow, whilst still experimenting with new flavours and concepts. Jack created this design because he really loves the simplicity and creative possibilities that domed/smooth surface moulds bring, as well as making it a lot easier for chocolatiers to polish and to clean. He loves that, whatever design you decorate a mould with, it always morphs perfectly with the mould shape. There are no sharp edges or indents that can throw the design off onto another course. He also thinks domed moulds are great for layering different fillings in bonbons, as they give you enough height to get creative with multiple fillings.

| 40 gr  | crushed feuillatine wafer                       |

1. Using a gloved finger, dab some edible gold dust into your mould cavity. Place your mould in the fridge to chill slightly.
2. Temper your coloured cocoa butters. Pour some blue cocoa butter into each mould cavity, a few drops in each. Working quickly to ensure it doesn't set, swirl your fingers around in each cavity to create a swirl effect. Place back in the fridge to allow cocoa butter to set. Then, repeat again with the white cocoa butter.
3. Temper your milk chocolate. Ensuring your moulds are now at room temperature, pour your chocolate into your cavity and create your shells. Tap any air bubbles out on your surface, before tipping out the excess chocolate. Scrape your moulds clean and place face down on a sheet of parchment paper. Place in the fridge to set.
4. Mix together your sugar, pectin nh and citric acid in a bowl. Add your blueberry puree to a saucepan, along with half of the sugar mixture, stirring to incorporate. Cook this mixture to 105c, stirring occasionally. Then, add the remaining sugar mixture, stirring constantly and cook to 110c. Remove from the heat and transfer to a piping bag to cool.
5. Melt your cocoa butter (or milk chocolate) and add this to your bowl of peanut praline paste. In addition, also add your crushed feuillatine wafer. Stir this mixture until thoroughly combined, and transfer to a piping bag.
6. Remove your now set shells from the fridge. Pipe half of your shells with your blueberry filling. Then, pipe the remaining half with your crunchy peanut praline, leaving a 1mm gap from the tap, to allow space for capping. Place in the fridge to set for at least 1 hour.
7. Temper your milk chocolate. Use a heat gun (or hairdryer if you don't have one) to slightly melt the top of your chocolate shells. Pour your tempered chocolate over the mould, and using your scraper, spread it across each cavity until all are covered. In one firm stroke, scrape across your mould from back to front to create flat and neat caps. Place mould back in the fridge to set for at least 30 minutes.
8. Un-mould your bonbons by tapping firmly against your work surface, and enjoy!
